March 23-28. Philadelphia, Penna. Spring Flower Show to be held at the Commercial Museum.

April 2-5. Oakland, Calif. Seventh Annual Spring Garden Club Show in the new Exhibition Building.

ROSES FROM CUTTINGS

WE DO not wish to start a discussion on the relative merits of own-root and budded roses. It may be that it is an accident of soil and culture, but roses of various types and many varieties, from cuttings planted in the Fall (preferably from about September 1 to October 15, but sometimes much later) will the next year make big, vigorous bushes with excellent root systems, and which persist for many years. A glass fruit jar is turned over each cutting, and before cold weather sets in, each jar is banked high with light soil. This is in southern Indiana, about 40 miles north of Louisville, Ky.

—Rebecca Parker.

Salem, Ind.
